PROFILE

Java focused Full-stack Developer with over 3 years of experience, specializing in enterprise-level systems within the insurance industry. Proven track record of improving systems based on business requirements and delivering rapid solutions through root cause analysis of complex technical issues.

WORK EXPERIENCE

MAR 2022 - JUN 2025
Mrint, Seoul, Korea
Java Full-stack developer

- Developed and maintained core modules (Customer, Common, and Subscription) for major financial clients including Heungkuk Life Insurance and SBI Savings Bank.
- Managed stable batch processing for 150,000+ customer records, ensuring data integrity and performance.
- Resolved complex production issues by performing root cause analysis of source code and logs to minimize system downtime.
- Delivered technical solutions and system improvements tailored to business stakeholders' requirements.

JUL 2020 - SEP 2020
Interpro, Seoul, Korea
Front-End Developer

- Independently handled the full lifecycle of service guidance pages, from UI implementation to data fetching.
- Built functional web components based on Figma designs, ensuring technical feasibility and consistency using Vue.js, JavaScript, HTML5 and CSS3.
- Optimized the data flow by connecting backend APIs to the frontend for real-time dashboard updates.
- Ensured cross-browser compatibility and robust responsive design to minimize system-wide display errors.
