PROFILE

Java focused Full-stack Developer with **over 3 years of experience**, specializing in enterprise-level systems within the insurance industry. Proven track record of improving systems based on business requirements and delivering rapid solutions through root cause analysis of complex technical issues.

SKILLS

- **Back-end:** Java, Spring Boot, Enterprise Frameworks (BXM, ProObject), SQL(Tibero, Oracle, PostgreSQL)
- **Front-end:** React, Angular, JavaScript(ES6+), TypeScript, HTML5, CSS3/SCSS, exBuilder6
- **Tools:** NCRM(CRM Solution), Git, SVN, Jenkins
- **Core Competencies:** Cross-cultural collaboration, Adaptability, Troubleshooting, Code validation, System operation & maintenance

WORK EXPERIENCE

Java Full-stack Developer | Mrint, Seoul, Korea

Mar 2022 - Jun 2025

Tech Stack : Java, Spring Boot, SQL(Tibero/Oracle), JavaScript, HTML/CSS, Jenkins, SVN

- Managed and optimized financial systems handling **1.2M+ customer records**, ensuring high availability and seamless data processing for major institutions.
- Took ownership of designing and implementing batch processing systems for **150,000+ records**, ensuring high data integrity and reliable delivery.
- Reduced system downtime by resolving **100+ production tickets annually** through deep-dive root cause analysis of Java source code and distributed logs.
- Successfully delivered **20+ system enhancements** for modules like Subscription and Customer, improving digital workflows for premier clients like Heungkuk Life Insurance.

Front-End Developer | Interpro, Seoul, Korea

Jul 2020 - Sep 2020

Tech Stack : Vue.js, JavaScript, jQuery, HTML5, CSS3, SCSS

- Built functional web components based on Figma designs, ensuring technical feasibility and consistency using **Vue.js, JavaScript, HTML5 and CSS3**.
- Optimized the data flow by connecting backend APIs to the frontend for real-time data updates.
- Ensured cross-browser compatibility and robust responsive design to minimize system-wide display errors.

PROJECTS

Tea Selection E-Commerce Platform | React, JavaScript, Supabase, CSS | [Github](#) | [LiveDemo](#)

- Developed a full-stack e-commerce site with real-time database integration using Supabase.
- Implemented dynamic filtering and secure user authentication, improving user engagement.
- Designed a responsive UI focused on high-quality visual presentation and seamless UX.
